

Ferrari Showroom, Egham

Stretch Ceilings Ltd once again achieve a stunning result this time within the Ferrari Showroom in Egham, Surrey for the Marranello dealership.

Approximately 140 square metres of Translucent Crystal White with a clear upper layer was installed, whilst incorporating the typical Ferrari design of curved corners. The main contractor responsible was particularly impressed with the project: -

'I am writing to express our thanks, for your efforts on delivering the above project. Without the help from you and your team, and your on-site efforts, the project would not have been the success it was.'

Once again, thank you, and I look forward to working with you all in the near future'

The Stretch fabric material offers a fantastic opportunity to create clean and cool or loud and colourful lighting effects and features using our Translucent material for lighting diffusion, backlighting and front or rear projection. The material is only 0.2mm thick, very lightweight (170gms/m.sq.) and offers approximately 75% light transmission.

Any type of fittings can be accommodated within the material and any light fitting can be used behind the stretched fabric diffuser including fluorescent, cold cathode, LED's, colour change, fibre optics, light cannons, spots etc to create unique lighting designs and features.
